

SYNOPSIS POSITION DESCRIPTION

Title: Project Engineer

Reports to: Operations Manager , Project Manager,
General Superintendent

Purpose/Objective Summary:

The PE program is a loosely structured, on-the-job training program that exposes entry level graduates (typical PE's will have a college degree in either Civil Engineering, Architectural Engineering or Building Science) to three functional areas 1) estimating, 2) project management, and 3) field supervision. PE's will make a determination on which above listed career path they care to pursue upon completion of their training.
